Unit 302 PMJ Building
1860 Evangelista Corner Cuangco Street
Pio del Pilar, Makati City 1230
Philippines

Dear Mr Marquez,

The following are our reply on your queries in a letter dated June 21, 2012:

1. 4.2.4.1 – Branded PCs
 - a. 4.2.4.1.1 Energy Smart or equivalent - **Energy Efficiency is acceptable and this is the same.**
 - b. 4.2.4.1.4 PC Client System and Data Protection Access - **Via Hardware, Software and/or OS is acceptable.**
 - c. 4.2.4.1.15 Drive Bays: 1 External 5.25" – **This is not typo error. We will use this for the external Optical Drive (CD, DVD, etc.) in case the internal DVD of the PC failed.**
 - d. 4.2.4.1.25, etc. – **The Department requires that the bidder is a Partner or Reseller of all the proposed solutions for five (5) years or more (see bid bulletin no. 1).**
2. 4.2.4.5 Enterprise Grade Backup System
 - a. 4.2.4.5.3 Supported Client: Free BSD – **Open Source is required by the department because our requirement for the BPPM & other future procurement required supports for open system.**
3. Section 6.5 Vendors Qualifications
 - a. 6.5.1 Systems Integrator for at least ten (10) years – **We required this for the benefit of the department and make sure that all the bidders or vendors are not fly by night companies.**
RA-9184 allowed all interested bidder to partner or JV with other SI companies that can qualify for this requirement.
 - b. 6.5.3 Single Largest Contract – The department's requirement is **Procurement and Implementation of Backup System Solutions and Personal Computers with Peripherals for the DOTC Central Office** so we need to abide by the rules of RA-

9184. Again, under RA-9184 - you are allowed to partner or JV with other companies to qualify.

For your information and guidance.

JOSE PERPETUO M. LOTILLA

Undersecretary for Legal and
Chairman, Bids and Awards Committee
